EXPERIENCE

Associate Software Developer

[Triser360](#)

01/2024 - Present

A technology-driven company focused on delivering innovative software solutions

- Spearheaded the development of the blog section, implementing a config-driven UI and utilizing Sanity CMS. Increased monthly blog views by 40%, resulting in improved user engagement
- Engaged in 50+ weekly standup meetings, receiving valuable mentorship and tasks from senior developers
- Deployed and managed websites on AWS, leveraging services such as EC2 and S3, for hosting and storage
- Developed/Managed 10+ GraphQL APIs, including documentation using mkdocs
- Boosted global user experience by implementing over 10 new features and redesigning the Home, Pricing Page using React and Sanity
- Optimized dashboard data management by leveraging react-table for data visualization, pagination, and exporting tables to PDF, ensuring seamless table-related functionalities

MERN Stack Developer Intern

[Upraised](#)

10/2023 - 12/2023

An organization dedicated to empowering individuals through technology

- Constructed fully responsive web pages, integrating all required functionalities to ensure a seamless user experience
- Managed server APIs, promptly resolving technical issues to optimize platform performance and reduce downtime by 20%
- Utilized libraries like d3.js and react-chart.js to enhance dashboard data visualization, improving user experience

EDUCATION

Bachelor of Technology

Dr. A.P.J Abdul Kalam Technical University

Lucknow

08/2019 - 05/2023

Intermediate

Dr. Virendra Swaroop Memorial Public School

Kanpur

01/2017 - 12/2018

PROJECTS

FOODMATA

<https://zwiggy-six.vercel.app>

A food order management system that integrates various services for a seamless user experience

- Integrated Swiggy's API for real-world data, ensuring accurate and updated food information, resulting in a 15% improvement in data
- Built a seamless cart feature using redux and local Storage for a user-friendly ordering experience, decreasing cart abandonment rate during testing by 25%
- Created features like stripe payment gateway and live geolocation for fetching nearby restaurants effectively.

TICKETMASTER

<https://ticket-master-gilt.vercel.app>

A ticket booking platform that enhances the user's ability to purchase and manage tickets efficiently

- Implemented WebSocket for real-time updates on ticket status, enhancing user experience during peak activity
- Integrated public APIs like Places (Google), Maps (Google), FourSquare, and MovieGlu to deliver real-time, location-based results and movie information
- Developed a dark mode UI toggle and seamless navigation features, boosting accessibility and user satisfaction

KEY ACHIEVEMENTS

- Achieved a global rank under 4000 in multiple Leetcode Weekly Contests and solved over 500 problems.
