SKILLS

MERN Stack Developer

1. NodeJs
2. ReactJs(Proficient)
3. MongoDB
4. ExpressJs
5. GraphQL
6. Typescript

Programming Skills

7. C/C++ (Proficient)
8. Python
9. JavaScript (Advanced)
10. Data Structures

Others

Slack, Git/github, Firebase, Tailwind CSS, HTML, Material UI, RESTfull API, Bootstrap, Redux, Context API

Interests/Hobbies

- Cricket
- Automobile (Cars)
- Travelling

WORK EXPERIENCE

Web Developer @Upraised (Jan 2024 - Present)

- Spearheaded the development of the blog section with a **config-driven UI**, utilizing Sanity CMS for streamlined content management, **enhancing user engagement.**
- Actively **participated in 50+ weekly standup meetings**, receiving valuable mentorship and tasks from senior developers.
- Developed/Update UI for various pages along with the functionalities
- Developed/Maintained **10+ GraphQL API's, including documentation** using mkdocs.
- Enhanced the global user experience by implementing **over 10 new features** and redesigning the Home, Pricing Page using React and Sanity.

Full Stack Development Intern @Devtown (Feb 2022 – June 2022)

- Built **fully responsive web pages** with all the required functionalities to **ensure** a seamless user experience.
- Updated/maintained server API's, swiftly resolving technical issues to **optimize platform performance.**
- Utilized libraries like d3.js and react-chart.js to **enhance dashboard data visualization**, improving user experience.

PROJECTS

Blog-App 🔗 - It's a Blogging website Jul-2023 - Aug-2023

- **Tech-Stack: Mongo Db, Express, Nodejs, Tailwind, React.**
- Implemented features like **Google Sign-In using firebase, context API** for state management and integrated MongoDB for efficient cloud storage.
- Using **JSON Web Tokens (JWT) for authorization** and designed key features for easy updates, comments, and photo sharing using CRUD APIs

Zwiggy 🔗 - It's a food ordering website Jul-2023 - Aug-2023

- **Tech-Stack: Express, Nodejs, React, CSS.**
- **Integrated Swiggy API for real-world data**, ensuring accurate and up-to-date food information.
- Developed a seamless **cart feature using redux and local Storage** for a user-friendly ordering experience.
- Implemented features like **stripe payment gateway, live geolocation** for fetching nearby restaurants dynamically.

SocioMedia 🔗 - It's a social media website Feb-2023 - July-2023

- **Tech-Stack: Mongo Db, Express, Nodejs, Material UI, React.**
- Added features like **posting status updates, photos, and liking posts.**
